

Let's hear your potential

Information & Integration Architect

Lokation: Smørum

If you are a skilled Information and Integration Architect, you now have the opportunity to join an international top company. IT plays a significant role in the achievement of Oticon's ambitious business goals. With the launch of a new strategy and organization in our IT function, the foundation for delivering to the coming year's exciting business challenges is laid. You can look forward to being part of an international environment in a leading company working with the latest technologies and a team of dedicated employees.

About the job

You will be part of our Strategy & Planning Team which among other things is responsible for IT Strategy, Enterprise Architecture, Portfolio and Project Management. You will be responsible for the integration, information and data architecture, as well as ensuring the consistency of the information architecture throughout the organisation. This will be done in close cooperation with the Enterprise Architect, the Master Data Team and the architects/developers whom are implementing a specific solution.

Since we are a global company, you can expect some travelling, approx. 10 days per year.

The primary work tasks will be:

- Map and document information object and the flows
- Understand the information need across process and business functions
- Be part of projects, not just as an active member but also as a counselling member
- Implement information and data models
- Ensuring the use of the information architecture in a complete system life cycle

Qualifications

You hold a relevant Master Degree +5 years' experience of information and data modelling. You have worked with BizTalk, implemented ESB's and integration brokers. You have a strong technical background and experience with the following technologies:

- BizTalk
- BizTalk ESB
- UML and Modelling tools

You have strong business focus and process understanding and you are proactive and result oriented. You have good communications skills and are the kind of person who makes things happens while maintaining the focus on teamwork. You are known as someone who create progress in projects and solutions. You work effortlessly in English.

You can expect

You will play an important role in our newly organized IT function. Together with ambitious and talented colleagues, you will be part of an innovative and challenging environment based on trust and openness, and where you will experience a strong will to win. We offer flexible working conditions and teamwork based on knowledge sharing and professional respect.
