

Danish companies ask for candidates in the Engineering Field

Electrical Engineer

With experience in Oil & Gas industry or similar process industry
With experience with medium / high voltage facilities, ideally within wind energy.
Experience with project management.

Electronic Engineer

Power Electronics Engineers are lacking in Sønderborg and Esbjerg region.

Mechanical Engineer

Preferable previous experience with the oil & gas industry, wind energy, chemical, petrochemical industry.
Solid knowledge of AutoCAD, 3-D modelling, SAP

Embedded Software Engineer

Minimum Bachelor degree in Computer Science, Software or Electrical Engineering.
SW / HW interaction.
Embedded software design, C/C++ programming.

Engineer within structural or offshore engineering

Chemical / Process Engineer

Experience with oil and gas / petrochemical industry / refinery.

Engineers for design of jacket structures

A bachelor's or master's degree in engineering of buildings/structures/machinery.
Experience with design of steel structures

Electrical, Instrumentation and Telecom Engineer (EIT)

In general there is a lack of engineers with education and experience in Oil & Gas, On/offshore industry.

Very good/excellent English skills are required, an additional foreign language/es is a plus. Experienced specialists with 3– 8/10 years of experience are required.

We are also looking for Specialist medical practitioners:
Radiology, Mammo Radiology, Pathology, Neurology
Psychiatry

In total I think there will be about 200-250 job offers.
