

WE ARE LOOKING FOR A COLLEAGUE TO THE DEVELOPMENT OF CIVIL 3D IN OUR INFRASTRUCTURE DIVISION

Do you find the design of large complex construction projects exciting? Then we have the job for you as a civil engineer where Civil 3D has a high profile. We use Civil 3D for design of major and minor infrastructure projects in Denmark and Norway.

The goal of your employment is to develop our Civil 3D skills. The development must be done in cooperation with Moe & employees who already have Civil 3D experience.

Your profile

- You are an expert in Civil 3D both on system and user level
- You have an educational background as a civil engineer
- You have typically 5-10 years of design experience
- You are able to be in charge of planning and design and see the potential of 3D design
- You have enthusiasm and a good sense of humour
- You can create a good working relationship between you and our Civil 3D users
- You possess good communications skills and engage in project work as well
- You are fluent in English both orally and in writing
- You are willing to stay/live in Copenhagen and willing to learn Danish

We offer

- an academically inspiring environment with good opportunities for personal and career development
- a challenging and independent job with autonomy and freedom as well as influence in our 3D development
- a dynamic work environment with focus on collaboration and flexibility
- attractive employee relations such as health insurance, employee bonuses, home office, lunch scheme, further education, active employee clubs, sports and cultural events, annual study- and skiing trips as well as an attractive salary package.

About us

Moe & Brødsgaard is one of the leading consultants in the building, construction, energy and industry fields. We are behind the engineering design of a number of large projects in Denmark and abroad. Moe & Brødsgaard is a company in strong growth and rapid development with more than 450 employees nationwide. In addition to the head office in Copenhagen we have offices in Vordingborg, Roskilde, Fredericia, Aalborg, Aarhus and a subsidiary in Norway.

New domicile in 2013

In 2013 the headquarters will be moving to Gladsaxe, into new and modern corporate headquarters. The building is located in near vicinity of Buddinge Station, close to both public transport and the ring road and as well as shopping. Moe & Brødsgaard focus on sustainability and the new headquarters is environmentally certified according to the standard DGNB.
